\*CIR calculation excludes FX gain from hedge position related with stage 1&2 provisions,\*\* Including potential write-off & NPL sales. \*\*\*Based on draft calculations for inflationary accounting 9M22 ROE is high-single digit.

### Key Takeaway

Momentum across all business lines including subsidiaries continue as the bank deploys its capital with sustainable profitability in focus.

### > Key drivers:

- Accelerated customer acquisition
- Healthy market share gains in Small and Medium Enterprises (SME) & consumer
- Proactive Asset and Liability Management (ALM) with maturity mismatch & interest rate risk management
- Highest level of efficiency
- Well-built provision book
- Robust capital buffers

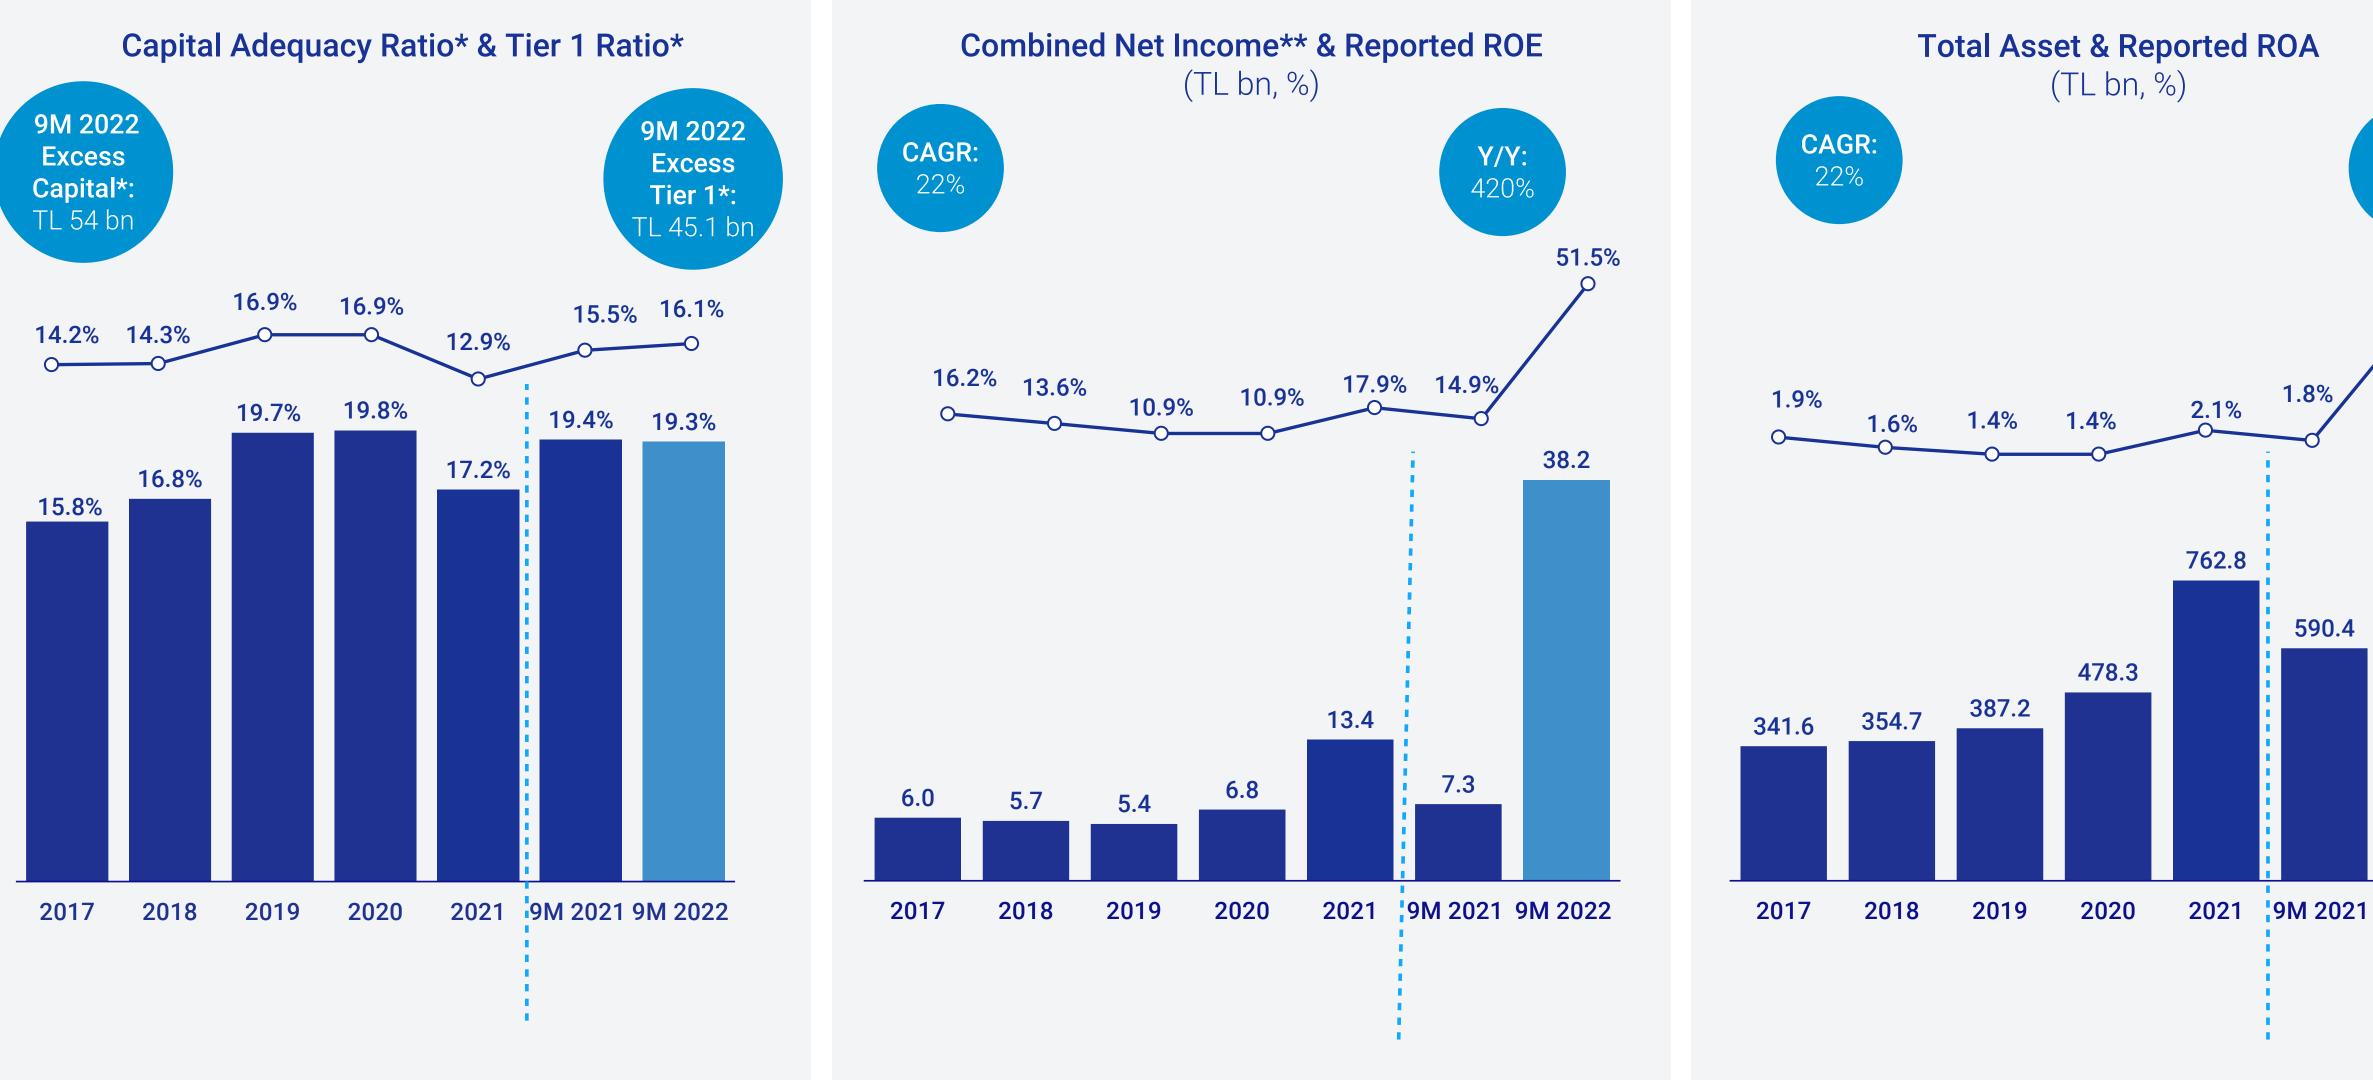

#### Financial Performance

### **Financial Performance**

\*w/o forbearances

\*\*Net income differs from consolidated bank financials due to different accounting treatment for amortization and free provision.

\*Excludes non-operational and non-recurring one off items . Comparable excludes IFRS16 impact in retail

\*Excludes non-operational and non-recurring one off items Comparable excludes IFRS16 impact in retail

## Appendix / IFRS16 Impact on Financials

In accordance with In IFRS16, most leased items with a duration longer than one year have to be included as an asset in the company books. In addition, the payments that will be made on the lease agreement have to be reported as a liability on the balance sheet. The depreciation of the asset and interest on the lease liability have to be included in the P&L instead of rent expenses. This leads to higher operating profit compared to the periods before the application of IFRS16. For comparison purposes, IFRS16 impact in retail segment is excluded.
