Explanations	

In alignment with the Group's strategy to lead economic growth and sustainability, it is aimed to strengthen the leading position of Enerjisa Enerji Üretim A.Ş. (Enerjisa Üretim), 50% of whose capital is indirectly owned by Sabancı Holding, in Türkiye's renewable energy market.

In line with this objective, Enerjisa Üretim has participated in the Wind Energy Renewable Energy Resource Area - 2024 (known as YEKA - 2024) tender for a total capacity of 1,200 MW across five regions.

As a result of this tender, with the approval of the Ministry of Energy and Natural Resources, YEKA usage rights agreements have been signed for the Edirne (410 MW) and Balkaya (340 MW) regions.

To commence investments in the Balkaya and Edirne regions, business relationships have been established for the supply, installation, and maintenance of turbines for a total capacity of 750 MW. The Balkaya and Edirne projects are planned to be gradually completed by the last quarter of 2027.

Additionally, the 1,000 MW installed capacity gained through previous tenders under YEKA RES - 2 is being gradually commissioned as investment continues.

With the completion of ongoing investments and the commissioning of additional capacity, Enerjisa Üretim aims to reach at least 6,250 MW of installed capacity by the end of 2028, thereby strengthening its leadership position in Turkey's private sector electricity generation.

Further developments will be made available to the public.

In case of a discrepancy between the Turkish and the English versions of this disclosure, the Turkish version shall prevail.
