- In accordance with In IFRS16, most leased items with a duration longer than one year have to be included as an asset in the company books. In addition, the payments that will be made on the lease agreement have to be reported as a liability on the balance sheet. The depreciation of the asset and interest on the lease liability have to be included in the P&L instead of rent expenses. This leads to higher operating profit compared to the periods before the application of IFRS16. For comparison purposes, IFRS16 impact in retail segment is excluded.
